SKILLS

JS/ES6/TS, React/Redux, Java/Spring Framework/Spring Cloud, Azure, PHP7/Laravel, RESTful Web Services, Git/Bitbucket, WP Theme/Plugin Dev, TDD, Scrum/SAFe, CI/CD

EXPERIENCE

Senior FrontEnd Engineer - Code.Hub, Athens (Greece)

JUNE 2019 - PRESENT

As a developer for Eurobank's e-banking platform at Code.Hub, I am instrumental in spearheading the development of crucial features. I oversee both frontend and backend aspects of the development process, conduct thorough code reviews, and troubleshoot issues.

My responsibilities also include ensuring seamless collaboration with product owners and visual designers to translate concepts into polished solutions.

Additionally, I am dedicated to fostering talent within the team, mentoring junior engineers to enhance their competency and efficiency, all while advocating for the adoption of reusable code practices

Technologies: React, Redux, ES6, TS, SCSS, Java, SpringBoot, Microservices , Azure

Full Stack Developer - Blexr LTD, Sliema (Malta)

AUGUST 2017 - SEPTEMBER 2018

Proficiently developing numerous websites in addition with my contribution to internal tools, I've honed skills in both frontend and backend aspects.

Notable achievements include designing custom WordPress plugins and overseeing hosting setup for each website's go-live process.

I've consistently reviewed code, debugged issues, and collaborated closely with stakeholders to ensure seamless project evolution.

Moreover, I've acted as a mentor to junior engineers, fostering a culture of continuous improvement and operational excellence

Technologies: OOP PHP, Bootstrap 4, CSS3, SCSS, HTML5, JQuery, Js, Wordpress, Laravel 5.7, Blade Templates.

Web Developer - Readmore Creative, Larissa (Greece)

APRIL 2016 - NOVEMBER 2016

I've designed, developed, and maintained mobile-friendly websites and e-commerce platforms. Specializing in transitioning legacy sites into mobile-responsive versions, I ensure an enhanced user experience across all devices.

With proficiency in gathering and refining technical specifications, I adeptly convert mockups into functional websites while implementing effective SEO strategies.

Additionally, I manage web hosting setup, provide end-user training, conduct thorough testing, and adhere to strict budgetary and scheduling guidelines to consistently deliver high-quality, targeted designs.

Technologies: OOP PHP, Bootstrap 4, UIKit, CSS3, HTML5, JQuery, Js, Wordpress, Joomla.

Web Developer & Designer (Independent Contractor)

NOVEMBER 2015 - APRIL 2016

I've designed, built, and maintained websites, incorporating best practices and utilizing Photoshop for crafting site layouts and user interfaces. Notably, I've developed custom websites and logos to elevate brand identity for clients such as [Panoigyroi](#), Kimatothraustis, and [Guesthouse Eos](#).

Managing design projects with meticulous attention to budget, equipment, performance, and legal considerations, I ensure optimal outcomes. Moreover, I provide comprehensive end-user training for seamless website maintenance and updates.

Additionally, I oversee hosting setup and meticulously execute go-live processes for each website

Technologies: OOP PHP, Bootstrap 4, CSS3, HTML5, JQuery, JS, Wordpress, Joomla.

Web Developer - ItBiz Digital Agency, Larissa (Greece)

JANUARY 2013 -SEPTEMBER 2013

I've designed, built, and maintained numerous websites and e-commerce platforms, ensuring their seamless functionality and user experience. By translating client requirements into actionable tasks, I've facilitated end-user training for website maintenance, empowering clients to manage their platforms effectively. Leading the design process from research to implementation, I've prioritized the creation of user-friendly interfaces.

Additionally, I've conducted pre-project analysis and troubleshooting to enhance site functionality and visual appeal. Reviewing project specifications, I've developed tailored solutions for multiple websites and established hosting setups for optimal performance. Implementing reusable code has streamlined development processes, optimizing efficiency.

Furthermore, I've successfully managed and promoted the online food ordering system deliverylarissa.gr to enhance accessibility and user engagement.

Technologies: OOP PHP, Bootstrap 4, CSS3, HTML5, JQuery, Js, Wordpress, Joomla.

EDUCATION

Master of Science (MSc) in Software Engineering for Internet and Mobile Applications
Technological Educational Institute (TEI) of Larissa, Greece
Graduated on June 2019

Bachelor of Science (BSc CS) Computer Science & Telecommunications
Technological Educational Institute (TEI) of Larissa, Greece
Graduated on December 2014

SOME OF MY PROJECTS

My City Routes Web App

The application, developed as the final thesis project for my MSc program in "Software Engineering for Internet and Mobile Applications," serves as an interactive presentation of Larissa city in Greece. Through curated walking routes, users are able to explore and navigate the city's landmarks and points of interest with ease..

Technologies: React, Redux, axios, ES6, Google Maps API, My City Routes Api

My City Routes API

This project, developed as the culmination of my MSc program in "Software Engineering for Internet and Mobile Applications," entails the creation of a RESTful API. Designed to provide routes with locations filtered by categories and cities, developers can leverage this API to construct various types of applications tailored to specific user needs.

Technologies: Java, Spring Boot, MySql, Rest API, Swagger, Oauth2, AWS

Cloud Gallery

The inception of this project occurred during a university class, where the idea for Cloud Gallery was conceived. Serving as a valuable tool for web developers and designers alike, this web application facilitates the seamless downloading and uploading of high-resolution images to Google Cloud.

Technologies: OOP PHP, Bootstrap 4, CSS3, HTML5, JQuery, Google App Engine.

Larissa City Event Guide REST API & Android Application

This project was developed as part of my thesis in the Department of Computer Science & Telecommunications. It features an application that enables users to discover all current events in the city of Larissa (Greece). The application comprises a RESTful API that delivers data in JSON format, complemented by an Android application designed to consume this data efficiently.

Technologies: RESTful API, JSON, PHP, MySql, Java, Android Studio.

CERTIFICATIONS

- Oracle Academy - Database Design and Programming with SQL
- Code.Hub - Microservices with Spring Boot
- UDEMY - Create REST APIs using Spring Data REST
- Lynda - PHP:Test-Driven Development with PHPUnit
- UDEMY - JSP, Servlets and JDBC for Beginners: Build a Database App
- Syddansk Universitet University of Southern Denmark (*This is a certification I gain for my studies in the University of Southern Denmark as an Erasmus student*)
